Roll In BRUTE Power With A Portable CART Jetter

The BRUTE Portable Cart Jetter packs roofer class power into a four-wheel cart you can roll anywhere the job takes you. Choose 9 GPM / 4000 PSI or 12 GPM / 3000 PSI for serious cleaning performance in tight or hard-to-reach locations.

Core CART Features

BRUTE Portable Cart Jettors are built for fast one man operation, with a full-feature control panel, onboard buffer tank, 300 feet of jetting hose on an electric rewind reel, and an optional wireless remote to keep controls at your fingertips.

KEY CART ADVANTAGES

- 4-Wheel Portability Kit
- 12-Gallon On-Board Water Tank
- Easy Connection to Many JNW Tank Options

Machine Features

The BRUTE Portable Cart Jetter combines easy 4-wheel mobility with fuel-injected V-twin power and a UDOR super-duty pump, giving you serious jetting performance in a compact, roll-anywhere package.

- 4-Wheel Portability Kit
- Full Panel-Mounted Controls
- Pulsation Control
- Fully Welded, Powder-Coated Frame

Premium Productivity Features

BRUTE Portable Cart Jettors are built for serious drain-cleaning performance. With a full-feature control panel, on-board water tank, and electric rewind jetting reel, every component is geared toward reliable, everyday jetting.

Personalize Your Ideal Jetting Package With The BRUTE SKID

The BRUTE 3012 and 4009 Mountable Skids turn your van, truck, or trailer into a compact jetting rig you can bolt down and go to work with. Pair it with your choice of Jetters North-west Water-Tank Skids to create a tailored, all-in-one package that delivers serious cleaning power in a tight footprint.

Core SKID Features

The BRUTE Mountable Skid Jetter offers 9-GPM / 4000-PSI or 12-GPM / 3000-PSI models, both equipped with a full-feature control panel, an onboard water buffer tank and an electric rewind jetter hose reel for fast and efficient operation.

KEY SKID ADVANTAGES

- Modular Design to Fit Any Space
- 12-Gallon On-Board Water Buffer Tank
- Easy Connection to Many JNW Tank/Skid Options

Convenient Productivity Features

The BRUTE Mountable Skid is built to keep you moving—these productivity features help you set up faster, stay in control, and wrap up each job with less hassle.

Machine Features

Build the jetter package you need! The modular BRUTE Skid with its flexible mounting options and multiple water tank configurations make it easy to tailor this jetter to your van, truck or trailer.

MODULAR SKID DESIGN & MOUNTING FLEXIBILITY

- Fully-Welded, Powder-Coated Frame
- Full Panel-Mounted Controls
- Pulsation Control
- 12-Gallon Water Buffer Tank
- Easy Connection to Auxiliary Water Tank

Tow In High-Flow, Heavy-Duty Jetting Power With The EAGLE 300

The EAGLE 300 Trailer Jetter delivers 20 GPM / 4000 PSI from dual fuel-injected, liquid-cooled Kawasaki V-twin engines driving dual UDOR super-duty pumps on a low-profile 300-gallon trailer that's towable full of water. With 500 ft of 1/2" jetting hose on a 12-volt swiveling reel, wireless remote control, and a second reel with 100 ft of supply hose, it's built for long mainline runs and heavy commercial work where you need serious flow and plenty of water on board.

180° Swivel Reel & Control Center

Take full command of your sewer jetter with panel-mounted controls that put jetting flow, engine start /stop, pressure, and pulsation right at your fingertips. Paired with a variable-speed hose reel and reinforced hose guide, this setup gives you smooth hose handling, precise pressure control, and faster, safer operation on every job.

CAPACITY, TOWING & SAFETY FEATURES

- Towable When Full of Water with a 5,200-GVW rating
- Electric Braking System
- Dual Fender-Mounted Storage Boxes Lockable 36-in. x 15-in. x 13-in. (each)
- Recessed LED Lighting
- Safety LED Beacon Light and 12-Volt Auxiliary Outlet

TRAILER FRAME & STRUCTURAL FEATURES

- Heavy-Duty Trailer Frame
- Lifetime Framework Warranty
- Protective Front-End Enclosure
- A-Frame Tongue with Heavy-Duty Jack
- Integral Water-Tank Mounting Saddle
- Step-Style Fender Supports
- Adjustable-Height Hitch (5-Position)

Trailer Capacity, Storage & Safety Upgrades

Even when fully loaded with water, the EAGLE 300 offers low-profile visibility and an electric braking system so you can haul, stop, and work safely in demanding conditions.

Lifetime Trailer Framework Warranty

Our sewer jetter trailer is built on a heavy-duty tubular steel frame and protected by a lifetime trailer framework warranty, with rust-free aluminum enclosure and integrated water-tank supports designed for years of jobsite abuse.

About In-Line Renewal Solutions

Built by Contractors. Backed by Experience. Focused on Your Growth.

At In-Line Renewal Solutions, we are more than an equipment supplier - we are a full ecosystem partner for plumbing, sewer, and trenchless professionals ready to build something bigger.

Rooted in the Northeast and backed by the field experience of Shelton Plumbing, our foundation goes back more than four decades. Since 1983, our team has lived the realities of home service: dynamic customers, complex jobs, and the constant pressure to evolve.

We didn't enter trenchless from a warehouse.
We entered it from the jobsite.

From Jobsite to Distribution

In-Line Renewal Solutions was created in 2022 to bridge the gap between manufacturers and real-world contractors. We use the equipment. We test the systems. We troubleshoot the problems. And we understand what it takes to make trenchless profitable - not just operational.

Whether you're:

- An independent contractor entering trenchless for the first time
- A sewer & drain company scaling into pipe rehabilitation
- Or an established operator looking to improve efficiency and margins

We provide more than tools - we provide guidance to help create the success you are looking for in your business.

What We Deliver A Complete Trenchless Ecosystem

Equipment, Consumables, Training, Repairs, Rentals and More.

(Image of all of the company logos)

Every product we offer is backed by field experience — not just a catalog.

Business Growth Support

Technology is only part of the equation.

Through our contractor-built network, **we help support:**

- Business planning
- Sales strategy development
- Team training
- Project management systems
- Scaling operations
- Marketing & positioning guidance
- Risk management and insurance insights

Because trenchless success isn't just technical - it's operational.

Our Commitment

At In-Line Renewal Solutions, we believe trenchless technology represents the future of infrastructure and home services. Our goal is to ensure contractors in the Northeast — and across the country — have access to the equipment, training, and business support necessary to compete and grow. Built by contractors since 1983. Focused on helping your team meet and exceed your goals.

Contractor to Contractor

We understand what it feels like to:

- Price your first lining job
- Train your first technician
- Invest in your first UV system
- Fix equipment under pressure
- Scale from 5 jobs a month to 50

We've been there. Our mission is simple:

To build a community of contractors equipped not only with tools - but with knowledge, confidence, and support from day one.
